

**Mattson
Macdonald
Young** structural engineers

Melissa takes pleasure in spending time with her family and pets. She and her husband, Ben, have a son and twin daughters. Melissa also enjoys baking, practicing yoga, reading and walking.

Melissa Daluge, Engineering Technician

Melissa has been involved in the fields of architectural and structural drafting since 2000 and has been with Mattson Macdonald Young since 2001 as an Engineering Technician. In that time, she has broadened her understanding of the structural engineering field by being involved in a wide variety of projects, including existing building renovations, apartments, churches, sculptures, warehouses and homes. Melissa generates construction documents using both Revit and AutoCAD.

In addition to drafting, Melissa helps develop and maintain company standards for AutoCAD and Revit. She also provides software support and troubleshooting to others in the office. Melissa enjoys learning about building construction and attends site visits to get a hands-on view of construction types.

Education

Associate of Applied Science Degree
North Hennepin Community College, 1998

Associate of Applied Science Degree in Architectural Drafting
Dunwoody Institute, 2001
